# Editorial

I would never have imagined in early 2020 that I would still be writing editorials during a pandemic in 2022. The positive side of not being able to travel and curtailing some of my normal activities, is that I have had more time for family history.

However, the initial flurry of queries on PUG-L have subsided to a trickle during the second half of 2021 and I am afraid that without Colin's article, based on his talk at the October Zoom meeting on dealing with surname changes (pages 5-8) this would have been a very thin newsletter. As always the January newsletter reports back on the Accounts and AGM (pages 14-16), together with the September Zoom discussions (page 17) and the rather limited discussions on PUG-L (page 9-13).

I think this is probably the shortest newsletter I have produced so I put in a heartfelt plea for more articles for the next edition. I always struggle to fill the July newsletter but I usually have less of a problem in January.

Or has the time come to rely solely on Zoom meetings and PUG-L?

I wish you a safe, happy and healthy 2022 and good luck with your researches.

Hanna Nicholas

## Newsletter Contributions

All contributions gratefully received, preferably by email. Articles of any length are welcome, as are photos, letters to the editor and suggestions on what you would like to have included in the next issue. Please let me have contributions by 30 June 2022 to **[editor@pugweb.org.uk](mailto:editor@pugweb.org.uk)**

# Chairman's Corner

Happy New Year and by the time you read this, Happy New Census. That said, I must have Scottish ancestry (my wife certainly has) since my plan is to (try to) hold off until the cost comes down.

2021 saw PUG dipping its toes into Zoom again. The short chat meeting that was hosted by Alan and Judith Mills (see the July 2021 Newsletter) went well. The AGM was again held by Zoom. However, we seem to have a reluctance to run regular Zoom sessions. I feel though that occasional (maybe quarterly) short chat sessions would be appreciated. I have a plan for February (see below) so maybe others could come up with something (mostly a date and time!) for April/May and July/August to see us through to the 2022 AGM meeting.

So, the plan for February ... Oxfordshire FHS has Myko Clelland talking about the 1921 Census on Monday 14 February and I have secured agreement to invite PUG members to come along. This will be an evening meeting with the talk starting at 20:00. The meeting routine includes breakout rooms ahead of the main talk (19:15-19:55) so we can have a PUG breakout room to chat about anything topical – and if you run out of things to say we may have to fill the gap by pointing out how wonderful Oxfordshire FHS is and would you like to join! If you wish to attend, please email me directly. I will send you a registration link a few days ahead of the talk.

In case the 1921 census is news to you (!), FindMyPast have a roadshow poster listing when talks are taking place on:

<https://i.findmypast.com/websites/content/pdfs/roadshow-poster.pdf>

Malcolm

# News from Pedigree Software

The latest version is 3.347 from February 2019. An update to PediTree version v3.347 is now available for all registered users with a name and address date 2015 or later.

Before downloading these updates from <http://www.pugweb.org.uk/pedigree-software/> you need to open PediTree to look at the copyright date in your name & address panel.

Upgrading to PediTree.exe v3.347 costs £12 for a CD or £10 just for a year of upgrades by web download. Although I can't accept debit/credit cards, if you email me with your choice of £10 or £12, I can get Paypal to invoice you and collect a card payment. Cheques are still acceptable, but should be payable to Pedigree Software.

In addition to the changes in 2020 to the Elton.55 definitions to improve GEDCOM 5.5 export, Colin Liebenrood has updated the picture scripts in the database version Elton55.2103, which is available to download from the PugWeb resources pages.

Use this opportunity to Export your database in GEDCOM 4 format. Make a new database from Elton55 and import your .ged file to it.

## Dates for your Diary

**Monday 14 February** for PUG Zoom meeting followed by talk on the 1921 census courtesy of the Oxfordshire Family History Society (see previous page).

The date for the 2022 AGM and meeting will probably be **Saturday 15 October 2022** by Zoom again. More details in the next newsletter. It is likely to follow the same informal format with the opportunity for group discussion of Pedigree/PediTree topics and more general computer and family history issues as raised by attendees.

# Preserving Family History with Surname Changes

At the recent AGM, I spoke about the preservation of our family history, with reference to two current aspects. Firstly, a relative has requested a copy of the information we have accumulated. Secondly, a family history society has started hosting family trees for its members; my paternal family was resident in their area and the society asked if we could provide a tree for their initial launch. Providing this tree involved some changes in the PediTree database design that might affect other users, so it is worth reporting the details.

To clarify what is involved, a bit of explanation about my paternal ancestors is needed. Having an unusual surname (**Liebenrood**), it seemed worthwhile to find out more about it. Family oral information and some artefacts indicated that this surname had been inherited in the 19th century, replacing a former surname of **Hancock**. Over some fifty years, we have undertaken research to clarify and confirm the details of this ancestry, using the usual resources of public records, mostly before on-line access was available. This has been aided by various family history societies, individual contacts and professional researchers, where distant local research was impractical for us.

The result of this is a lot of paper, written and maintained by my wife, Anne, while I was still in employment. Little of this has been digitised to date, partly because Anne doesn't type or use a computer; her excellent handwriting is always readable! Apart from the text documents, a number of hand-drawn charts illustrate the relationships involved, also there is a card-index to all the individuals involved.

For the copy for a relative, scanning of the material has started with some biographies (97 pages), the charts (39 pages) and the card-index (191 cards, 68 two-sided). The scans have been converted to three PDF files with bookmarks and brief introductions. The techniques used have been developed on other projects that make the conversion to PDF fairly easy. I'm not going into the details here. Scanning a number of photographs will produce a fourth PDF file to complete a useful top-level copy to go onto a CD. That will leave five other A4 ring-binders containing certificates and correspondence for later attention.

The other request was for a family tree relevant to a particular area for a new on-line facility. My paternal family, with both **Liebenrood** and **Hancock** surnames, was resident in Berkshire during the 18th to 20th centuries. So we joined the Berkshire Family History Society early in our researches, to our considerable advantage. Subsequently I've undertaken a number of computer-based projects for them, which led to the request for the family tree for their new members-only facility. That involved putting some 80+ individuals into PediTree, to export a suitable GEDCOM file. In turn, that needed a decision on how to handle the multiple changes of surname involved, which was found to need a few alterations in the database design. To explain what is involved, I need to outline the relevant parts of my family history.

Let's start with my gt-gt-grandfather Rear-Admiral John Hiatt **Hancock** (c.1764–1839), and his sister Lucy (1762–1829), who we'll meet again. Their father was Samuel **Hancock** (1731–83), innkeeper of the George & Pelican at Speen, near Newbury, Berkshire, a staging-post on the Bath to London road (now the A4). John Hiatt had six children, of which Capt. John **Hancock** (c.1813–83) was my gt-grandfather. He probably met his wife while surveying the coast of Prince Edward Island, Canada, where all his seven children were born, including my grandfather, John. So far, so good. (I'm afraid the forename John litters this description, but I'll try to keep the occurrences clear!)

Next, John George **Liebenrood** (c.1712–1795), born in Germany, became 'a rich merchant in London', trading in furs and wine. He married, then settled and died in Purley, Reading, Berkshire, leaving no children. His will passed his estate to his German great-nephew John Engelberts **Ziegenbein** (c.1753–1821), on condition that he took the surname of **Liebenrood**. John Engelberts then married Lucy **Hancock**, who we met above. They built a fine house in Prospect Park, Reading and had three children. John Engelberts and one child died before Lucy; the other two children didn't marry. In 1865, after Lucy and the two remaining children had died, Lucy's will passed her estate to her nephew Capt. John **Hancock**, with the condition that he and his descendants took the **Liebenrood** surname. The family finally all left the Prospect Park house and estate in 1902, when the park was sold to Reading council for the benefit of the public. The house is now a restaurant. The final wrinkle on changing surname came in 1915, when some of the descendants in the WW1 army found the German Liebenrood surname an embarrassment, so reverted to Han[d]cock.

So producing a tree for Berkshire F H S involves the two major changes of surname described above. Looking at the specification for GEDCOM 5.5 showed that an individual can have several surnames, but there's no

obvious structure to make the name-changes clear. The only way seems to be a suitable note. How can we give several surnames to an individual in PediTree? Actually, that looks easy: simply add a second surname — and a note. Below is Capt. John Hancock, Liebenrood in the Edit display. Just to be certain, a GEDCOM 4 export imported into a new database showed that the second surname was imported correctly. Good! What about GEDCOM 5.5? Not so good; the result is not correct and a small change is needed.

Capt John HANCOCK, LIEBENROOD (abt.1813-11May1883) (View only)

Fields	Data for Person 37
c sex	M

As you know, PediTree uses picture scripts to generate the output for GEDCOM 5.5; a change to script Person.GEDCOM is what is needed. Without this, the GEDCOM Name output is:

```
1 NAME John /Hancock
Liebenrood/
```

What is needed is a single line:

```
1 NAME John /Hancock, Liebenrood/
```

Here's part of the GEDCOM picture script with two added lines (in bold):

```
|[| FAMS(marriages)]
separator = ", "
[|"1 NAME " forenames" /"surname "/"postfix]
separator = |
if forenames present or surname present then
  [|"2 NPFX "prefix]
  [|"2 NICK "nickname]
end
...
```

Another similar addition is needed in the Person.name picture script:

```
prefix
if forenames <"A" then" " end
forenames" "
separator = ", "
surname()
postfix ["(" nickname ")"]
...
```

Finally, the handling of places in the Residence group wasn't as tidy as it should be. Berkshire F H S asked that the presentation of these should be consistent and without abbreviations, for example:

Purley, Berkshire, England

This caused a little alteration to the Residence.RESI picture script, as well as care in entering the place information. Here's the altered RESI script:-

```
"1 RESI"
if to present then |"2 DATE "["BET"from"AND"] to
else [|"2 DATE "from] end
|"2 PLAC " [dwelling"," road] [locality] [", "town]
[", "county][", "postcode][", " country]
if source present then
  GCITE(source)
end
```

I asked a PUG user of Family Tree Maker to import a short GEDCOM 5.5 file in this format, which seemed to work reasonably well (thank you, Sheila). So I submitted the full file to the Berkshire F H S and eventually saw the result. This displayed the multiple surnames as expected and the relevant notes.

It remains for me to provide a version of Elton55 with these changes, in case they may be of use to others.

Colin Liebenrood  
30 November 2021

PUG is an associate member of the Family History Federation (now the operating name of the Federation of Family History Societies). If you haven't already done so, you can find a wealth of useful information and/or sign up to receive updates and their monthly Really Useful Bulletin at: <https://www.familyhistoryfederation.com/>

Malcolm has regularly forwarded information about events etc to PUG-L but as these are all in the past, I have not reproduced these. He has also been forwarding the Really Useful Bulletin to PUG-L but he suggested in December that if you are interested, you should sign up to receive the free newsletter direct to your inbox.

Hanna Nicholas

## **Recent PUG-L Activity**

What follows is slightly edited versions of the exchanges on PUG-L over the past six months. The bulk of the activity has been discussions around the September Zoom meeting (see page 17), the AGM (see pages 15-16) or the various emails Malcolm has forwarded from the FHF as mentioned above so this is the shortest ever report back. I hope 2022 will bring some further discussions and queries which I include in the July newsletter!

Hanna Nicholas

## Usage of the Database Skeletons

Reading the article on the latest Elton55 database skeletons on p7 of the July 2021 newsletter I am confused as to which may be regarded as the latest version for general use (as opposed to interfacing with Family Tree Maker).

1. Is version 1510 still regarded as the latest update for general use with Peditree version 3.347?
2. or, does either version 2011 or version 2103 entirely supersede version 1510
3. or, are versions 2011 and/or 2103 only recommended for adoption when access to Family Tree Maker is needed?

Ian Sandham

Although the recent updates were focussed on comments from users of Family Tree Maker, they also fixed some other unrelated issues of exporting GEDCOM 5.5.

So the current version 2103 supersedes all other versions for general use. If anyone knows otherwise, I'd like to know!

On the other hand, if you have no intention of exporting data to other applications using GEDCOM 5.5, then there's no point in updating your installation. For export to another Pedigree database, GEDCOM 4 is the version to use, which is not affected by these changes.

Colin Liebenrood

## Printing Trees

If I want to send someone a tree (about twice a month for my one name study) I usually print to a PDF so that they can print it out themselves and stick the sheets together as necessary. I spend quite a lot of time playing with fonts, text sizes and detail level to get it arranged as neatly as possible on the sheets. Of course sometimes I go for landscape printing and sometimes portrait and inevitably whatever I set it to last time is never what I need next time.

What I have always wanted is to be able to save a set of optimal settings for a particular orientation and detail so that I can easily switch print settings. Similarly when going from wide trees to tall trees.

During lockdown I decided to make fan charts for some family members. My handwriting is not up to the level of neatness required especially as I'm trying for 8 generations. In the end I used AutoCAD LT to draw the fan but it's a lot of work transferring the data manually.

It would be great to have a fan chart option in Pedigree with a definable number of generations. Is this something that is worth consideration?

Dave Puttock

I wonder David, do you use these two regular printing setups on the same database, or do you use them on two separate databases?

If the latter, then there is an easy solution - two installations of PediTree in separate folders.

Malcolm Austen

There's an easy way to get fan charts from PediTree, using an on-line facility at <https://treeseek.com/gedcom>. You just need a GEDCOM 5.5 export from PediTree that you can upload. I've just tried a couple that look pretty good. It's not likely that this could be built-in to PediTree.

Colin Liebenrood

Regarding the printing, I am always using the same database. I run a one name study so I have about 40 family groups totalling about 12000 people plus another 3000 individuals.

They all need to be in the same database as the object is to try and join groups together or at least add individuals to groups.

So when I get an enquiry I often have to print out a family group but that could be 30 people or 1000 people.

Dave Puttock

## Updating PediTree

I downloaded the pedigree.enc file to my pedigree folder. My folder is on the c drive but under users/documents/familyhistory/pedigree and not just straight c:\pedigree.

I have clicked on the supplied link and downloaded the latest .exe file to the same folder. This loaded ok.

My last download was pt3306. Do I have to download all the updates which are supplied or does the latest have them all?

Murray then talks about extracting several files from the update. I'm not sure from what file in the pedigree folder I'm extracting from.

Chris Watts

Presumably the 'latest .exe' you downloaded was pt3347.exe? If so, this is an installer that you need to run. This will request the password that Murray will have sent, then will install the updated PediTree and all related files. You will need to specify your pedigree folder for the installation, not c:\pedigree.

You will then be up to date, except for the Elton55.ped database. You'll need to get the latest version of that from PUGWeb at <http://www.pugweb.org.uk/resources/dbskels>.

Colin Liebenrood

## **Access to PUG-L**

Thank you Carys, Malcolm and 'admin' for help with restoring my email links to PUG.

I was left with the problem of locating the address of the members area. I eventually found it in the January edition of the newsletter, after seeing no reference to it in any of the PUG webpages. The references to the very existence of a members area appeared to be in hushed tones, as if this was 'top secret'! Could I suggest this inclusion into a suitable webpage be added to the 'to do' list; or have I missed a reference to it?

Ian Sandham

The PUG web site is, as ever - <http://www.pugweb.org.uk>

The front page has four sections - main (for members); join/renew; Pedigree Software; AGM

The first of those points you to PUGwiki - <http://pugweb.org.uk/pugwiki>

Scrolling down there gets to a section "PUG members' area"

So it seems to me that you have indeed "missed it", but if it is just too obscure or too far buried then perhaps we can discuss how it could be better arranged.

Malcolm Austen

# **Pedigree Users Group**

## **Minutes of the Annual General Meeting held by Zoom on Saturday 16 October 2021**

### **Present:**

Malcolm Austen, Clare Pilkington, Carys Faichney, Dick Walker, William Terrell, Sheila Culross, Tom Hart, Michael Hulme, George Ruscoe, Hanna Nicholas, Sheila Jelley, Bob Golder, Brian Baker, Deborah Knight, Colin Liebenrood, Bob Adams, Dave Morecombe and David Sears (with apologies for arriving late).

Apologies were received from Sally Ritchie and Murray Kennedy.

The minutes of the 2020 AGM which had been previously published in the PUG newsletter were approved. There were no matters arising.

### **Chairman's Report:**

There had been two Zoom meetings over the year, the first led by Alan Mills and the second by Clare Pilkington and Carys Faichney. The PUG-I list had been moved to groups@io. Malcolm thanked Hanna, Bob, Carys and Clare for their efforts over the year. He also remembered Rod Clayburn who died some months ago.

### **Membership Secretary's Report:**

PUG had had 82 members last year, we are now 78. The losses include Rod Clayburn and Cecil Humphrey-Smith. One member does not have an email address and 10 have not joined groups@io.

### **Newsletter Editor's Report:**

Contributions are always welcome, particularly for the July edition. The January newsletter carries the reports on the AGM and any activities of the day.

### **Treasurer's Report:**

The accounts were displayed on screen for members' perusal. The FFHS had halved their fee last year without informing PUG so no fee was due this year. Regarding the website hosting, Malcolm Austen had been overpaid his expenses; he will refund PUG shortly. There was a slight surplus this year.

Acceptance of the accounts was proposed by Dick Walker and seconded by Colin Liebenrood, all agreed.

**Election of Committee:**

The re-election of the committee was proposed by Sheila Jelley and seconded by Dave Morecombe, all agreed.

**Election of the Examiner of the Accounts:**

Malcolm Austen proposed that David Sears be re-elected, seconded Michael Hulme, all agreed.

This concluded the business of the AGM.

Malcolm Austen raised the question of where the 2022 AGM should be held, online or at Oxford or elsewhere. Dick Walker said he was not able to travel so would prefer a Zoom meeting. This was also the view of David Sears and Sheila Jelley. Saturday 15<sup>th</sup> October 2022 was suggested as the date. A further Zoom meeting in March/April was proposed; volunteers were needed to lead this and any other meetings. Perhaps this meeting could be a mid-week afternoon.

Clare Pilkington  
Hon. Secretary

**Pedigree Users Group**  
**Minutes of a meeting held 22<sup>nd</sup> September 2021 at**  
**6.30pm via Zoom**

**Present:**

Graham Moore, Clare Pilkington, Michael Hulme, Carys Faichney, George Ruscoe, Sheila Jelley, and Dave Morecombe

Apologies were received from Hanna Nicholas, Alan & Judith Mills, Colin Liebenrood, Ken Wiggins, Sally Ritchie and Malcolm Austen.

**The purpose of the meeting was to generate ideas for discussion on the AGM Day.**

Clare Pilkington opened the discussions, talking about trees; whether the font used on trees could be altered to bold for names and different sized fonts for other information. This led to discussions on whether anyone actually printed trees nowadays or whether people preferred to save them as pdfs before giving them to family members.

Dave Morecombe was still using Pedigree in preference to Peditree and was experiencing problems with increasing the size of his database file. Various people had suggestions, ranging from changing it in Peditree rather than Pedigree to ensuring he was using Gedcom 4. Dave would take the suggestions and have another try.

Sheila Jelley described how she was downsizing her family history collection, in particular her several one name studies, which she was uploading to the GOONS website for anyone to use. However she was finding this a monumental task involving checking much of the information!

There was further discussion on our family history legacy. Having files in Gedcom format rather than just in Peditree was favoured, also using good old paper!

We ran out of time!

Clare Pilkington

# Membership

I am happy to report that our membership numbers have held up well this year with fewer resignations and lost members than in many previous years. There are now 79 of us, with 50 having paid online; the number is creeping up every year.

We have a wealth of experience between us, though it is now sometimes reminders of once-familiar actions we need help with! I find my brick walls stay in place, but that my trees expand sideways with new distant cousins found through my DNA results. I am looking forward to what the 1921 census may reveal, in addition to credit card entries that is!

Wishing you all a Happy New Year and may your searches be successful,

Carys Faichney

## Reminders

**PUGweb** is the website run by PUG on which you can find useful information about Pedigree and PediTree, download software, and generally keep up to date with developments and queries about the software. Details may be found at <http://www.pugweb.org.uk/> It includes Colin Liebenrood's FAQs.

**PUG-L** is the email forum to which the majority of PUG members already belong. Full details about joining can be found on PUGweb. If you are still uncertain about how to do this, please contact one of the Committee (addresses and other contact details on the next page). The address is **[pug-l@pugweb.org.uk](mailto:pug-l@pugweb.org.uk)**

**Latest Newsletter available for download:** As well as this newsletter, you can now find all the previous editions on PUGweb. You will need to log onto the member only area at <http://pugweb.org.uk/members/only/start>

If you don't yet have login details, you need to apply for a user ID by emailing Carys at [membership@pugweb.org.uk](mailto:membership@pugweb.org.uk). Once you have your user ID, you will be also sent an automatically generated password.
